Alternative model · higher risk, higher return

ER OUT-OF-NETWORK REVENUE CYCLE

Model B: Automation-First

Lebanon delivers every IDR Gateway action as a ready-to-submit bundle. A 3-person US desk checks and files it in about 10 minutes, using a Submission Cockpit instead of typing.

3
US staff instead of 7

~10 min
US filing time per dispute, down from about 47

$154–177K
Saved per year at today's volume

$0.45–0.55M
Saved per year by year two

$0
Recruiting fees or new infrastructure: hiring is in-house, systems already exist

Our proposal is Model C, the middle ground. It files each dispute in about 15 minutes with a 5-person US desk that copies from the IDR Prep Studio, and it needs no Gateway approval beyond the onshore rule. Model B stays the long-term option once the Gateway confirms in writing that assisted form filling is allowed.

IDEAS WE WEIGHED

Eight unconventional ideas: five in, one conditional, two rejected

The mirror bot is the one idea we won't build. It would let Lebanon operate the Gateway through a US PC, which is the access the onshore rule removes. The Cockpit reaches the same 3-person target with a US person genuinely doing the work.

REJECTED

Mirror bot

Lebanese actions replayed on a US PC: offshore access by proxy

ONLY IF ALLOWED

Fully automatic submission

Needs written confirmation that the Gateway's terms allow it

IN

Submission Cockpit

A US operator runs every session; the tool removes the typing

IN, IF AVAILABLE

Gateway bulk upload

The biggest saving on large batches

IN

AI dispute factory

AI drafts packets, reports and offers; specialists approve them

IN

AI determination reader

Outcomes logged in ClickUp overnight

IN

Three staggered US shifts

12 hours of filing a day with 3 people

REJECTED

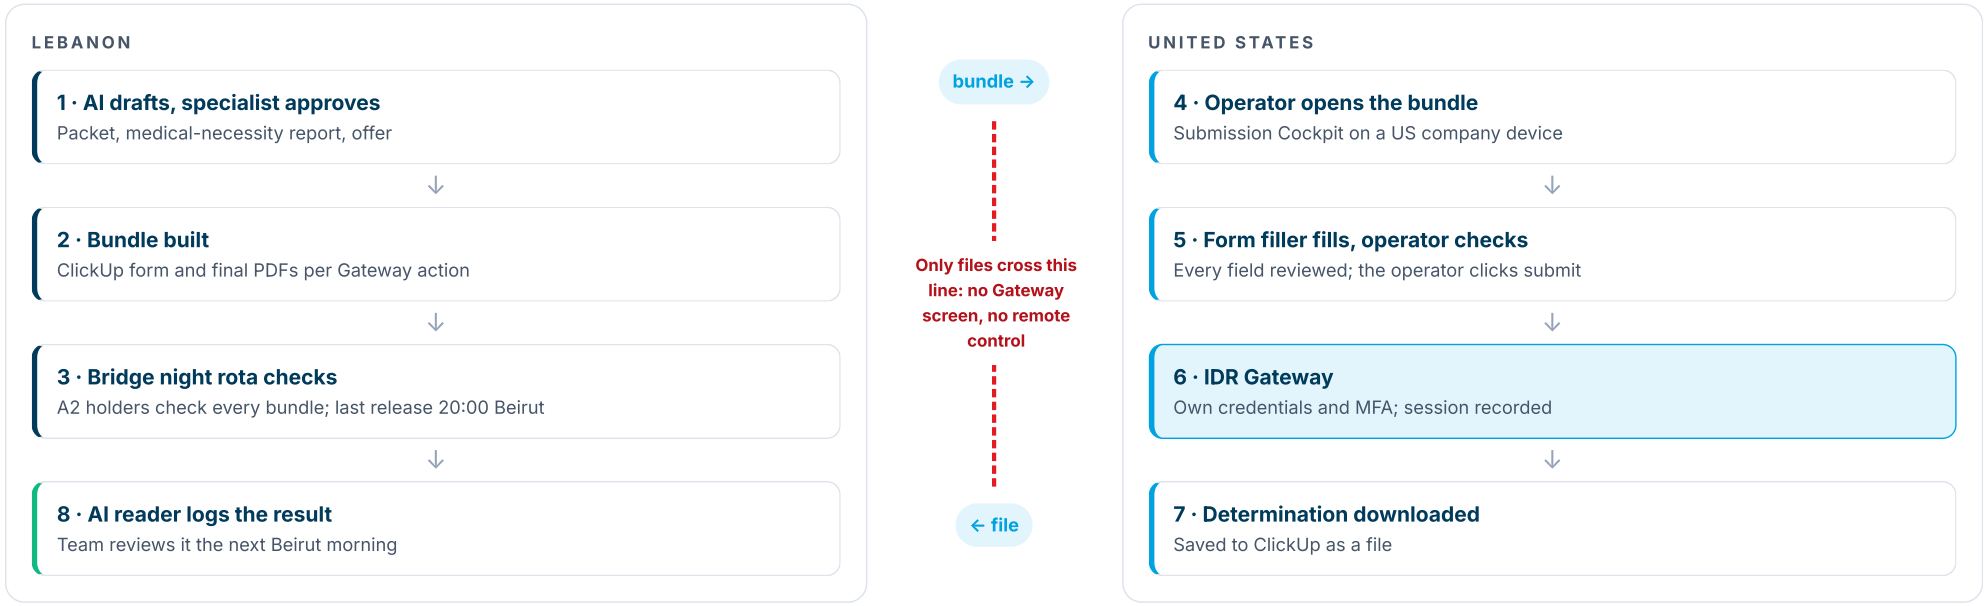

US gig marketplace

PHI, training and control risks are too high

HOW IT WORKS

Only files cross to the US; a US operator files every action

The operator never types, looks anything up or makes a decision. Their job is to check and submit.

COMPLIANCE GUARDRAILS

Only a US person, on a US device, ever acts in the Gateway

Before we build: written legal sign-off on the Cockpit, and written confirmation that the Gateway's terms allow assisted form filling. If either is no, the desk stays at Model A's size.

Always

- ✔ A named US operator signs in with their own credentials and MFA
- ✔ The operator reviews every field and clicks submit personally
- ✔ Lebanon sends bundles; the US sends back result files
- ✔ Every session is logged and screen-recorded on the US device
- ✔ A HIPAA BAA with every vendor that holds PHI

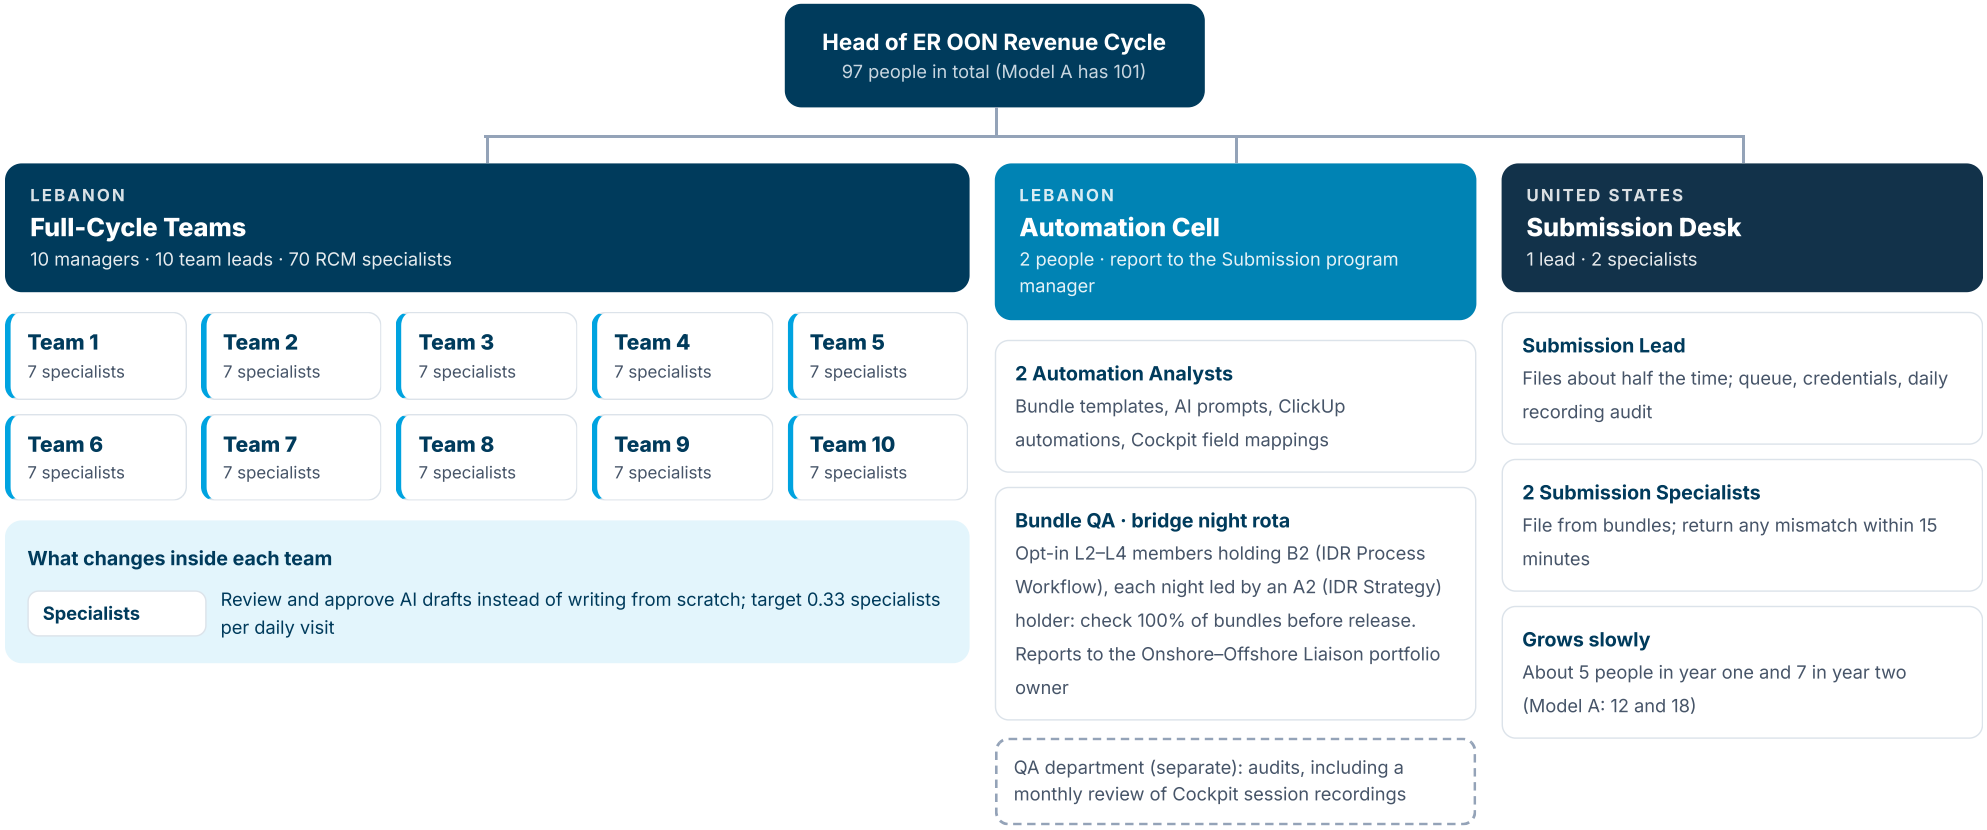

Never

- ✕ Shared logins, or credentials stored on a server
- ✕ Unattended submission without the Gateway's written permission
- ✕ Screen sharing, remote control or mirroring of a session to Lebanon
- ✕ Offshore staff seeing live Gateway screens
- ✕ PHI in any tool without a BAA

STRUCTURE

Same 10 teams; a 2-person Automation Cell, a bridge night rota and a 3-person US desk

Lebanon stays at 94 people. The Automation Cell is 2 people from existing staff. Bundle QA is done by the bridge night rota, which members opt into on top of their regular role. QA stays the separate department it is today.

JOB DESCRIPTIONS

Four new or changed roles

UNITED STATES · 1

Submission Lead

Direct hire · full benefits · remote work

Owns same-day filing and Gateway compliance in the US.

DUTIES

- Files bundles about half the time
- Assigns the queue and plans coverage
- Manages credentials, MFA and access reviews
- Audits session recordings daily

REQUIREMENTS

3+ years in healthcare revenue cycle or payer portals; NSA/IDR experience preferred; HIPAA-trained; based in the US

KPIS

100% same-day filing · zero errors reaching the Gateway · backlog under 1 day

UNITED STATES · 2

Submission Specialist

Direct hire · full benefits · remote work

Files Gateway actions from bundles, accurately and on the same day.

DUTIES

- Works the Cockpit queue during the shift
- Checks every field against the checklist, then submits
- Records fees; downloads determinations
- Returns any mismatch within 15 minutes

REQUIREMENTS

1–2 years of healthcare or insurance data entry; passes a 99% accuracy test; HIPAA-trained; based in the US

KPIS

About 40 disputes' worth of actions per shift · error rate under 0.5% · same-day completion

LEBANON · 2

Automation Analyst

Drawn from existing L3 staff

Keeps bundles and AI drafts accurate and fast.

DUTIES

- Maintains a bundle template for each Gateway action
- Keeps the AI prompt library versioned
- Builds ClickUp automations
- Fixes Cockpit mappings when the Gateway changes

REQUIREMENTS

L3 Senior Specialist I, or a strong L2 holding B2; A5 Innovation preferred; confident with ClickUp and spreadsheets; scripting a plus

KPIS

Bundle defects under 2% · at least 80% of AI drafts accepted · mapping fixes within 1 day

LEBANON · OPT-IN ROTA

Bridge night rota (Bundle QA)

Regular role + $300–3,000/quarter from the rota pool

Nothing reaches the US desk unless it is ready to file. Team leads no longer staff the bridge.

WHO AND WHEN

Any L2, L3 or L4 holding B2 can opt in; each night has at least one A2 holder as night lead. 16:00–24:00 Beirut (08:00–16:00 CT), Monday to Friday, 2 members a night. The rota is set each quarter from the opt-ins: 10 members at 1 night a week, up to 20 at 1 night every other week.

DUTIES

- Checks every bundle against the checklist before release
- Answers the US desk within 15 minutes
- Fixes rejected bundles the same US day
- Posts the nightly handover log

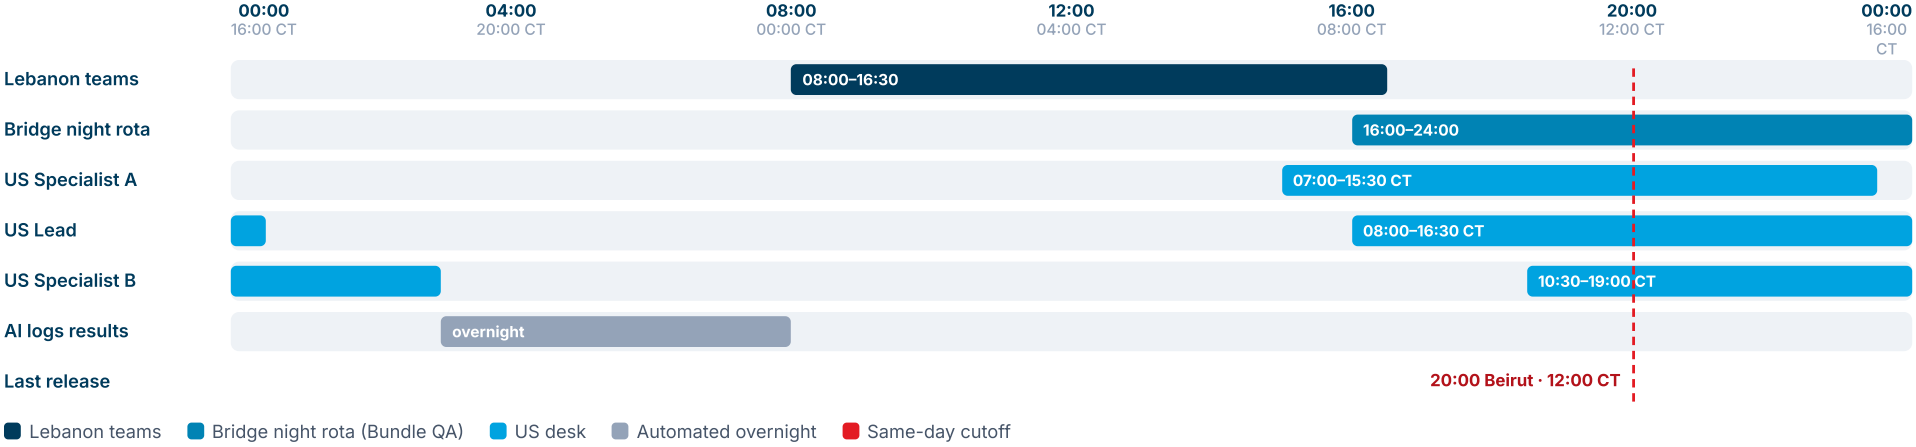

ROTA POOL

A fixed $30,000 pool a quarter shared equally, $300–3,000 per member (about $230 per night worked). Full share when the rota hits 98% first pass, 15-minute answers and no deadline missed because of a bundle, and the member works all assigned nights; missed nights reduce it pro rata.

SCHEDULE

One 24-hour loop: Lebanon prepares, the US files, results wait by morning

Shown in Beirut time, with Central time underneath; the offset is 8 hours for most of the year. At least 2 of the 3 US staff work every weekday, and 2 trained on-call staff, recruited in-house, cover sickness.

BENEFITS

A non-cash package for the US desk, and the night rota pool

Levels follow Model A. No one's pay goes down, and every move up a level comes with a pay raise.

US package

Direct hire, health benefits, 15 days' paid leave, remote work on an existing company device

Guardrail: US-only devices and network; session recording on

Bridge night rota · $300–3,000/quarter

$30,000 pool a quarter shared equally by the rota; up to $120,000 a year

Guardrail: full share only when rota targets are met; missed nights reduce it pro rata

TOOLS AND TECHNOLOGY

One new build, made in-house; everything else runs on what we already have

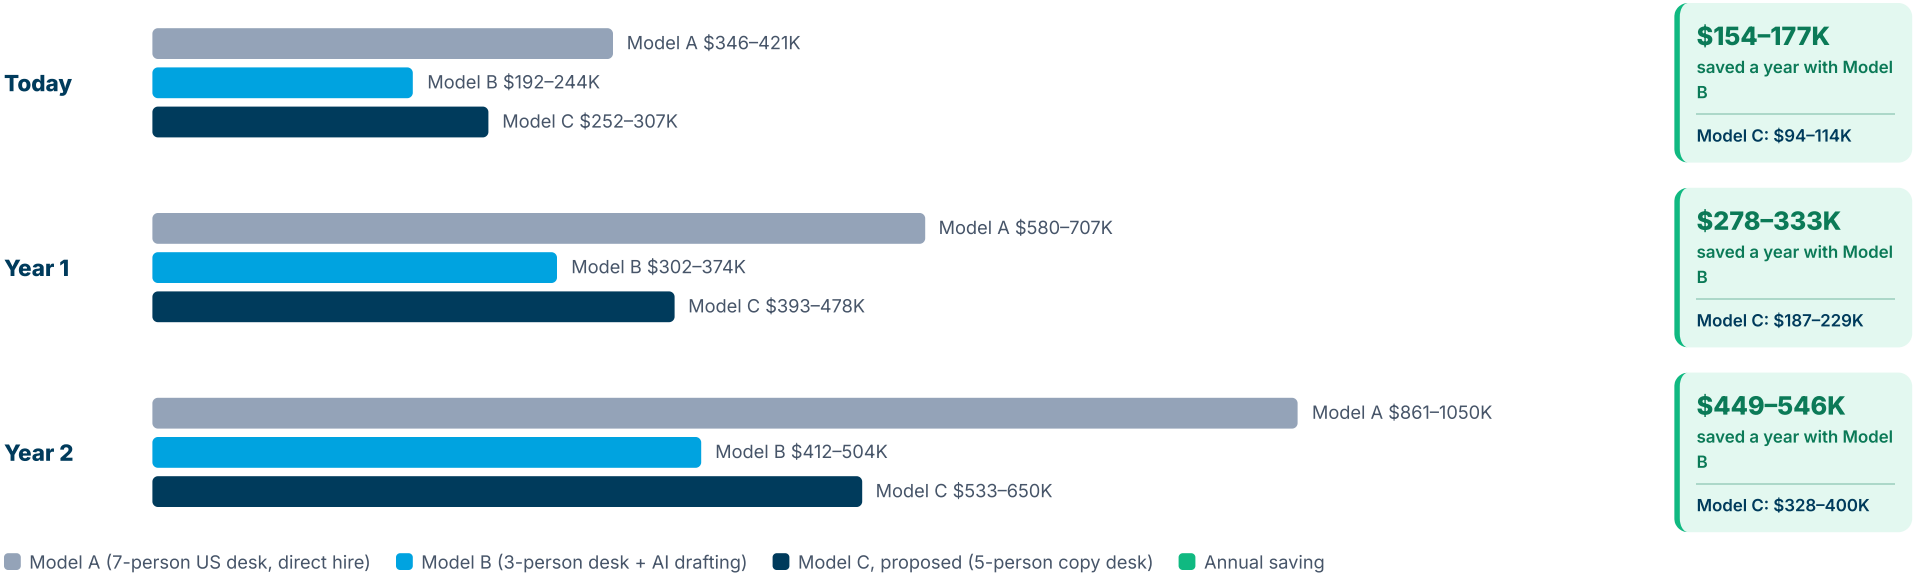

The Cockpit is built on our existing systems, starting from the IDR Prep Studio. Model A's ClickUp ticket workflow and deadline engine stay underneath as the fallback.

TOOL	WHAT IT DOES	TYPE	ESTIMATED COST (USD)	READY
Submission Cockpit	US-hosted app with sign-on and MFA: bundle queue, checklists, audit log	Build in-house	Staff time; existing systems	Feb 2027
Form filler	Operator-started browser extension on the US desk's company devices; fills the page, never submits by itself	Build in-house	Included	Feb 2027, if allowed
Bundle builder	ClickUp form for each action, plus automatic PDF assembly	Configure	Staff time	Jan 2027
AI drafting	Packets, medical-necessity reports, offer letters for approval	Buy, with BAA	12,000–30,000/year	Jan 2027
AI determination reader	Turns determination PDFs into ClickUp fields overnight	Build in-house	Included	Mar 2027
US device security	Device management, screen recording, US-only network on existing devices	Configure	Staff time	Dec 2026
Dashboards	Net Recovery, bundle quality, US queue	Configure	Low	Feb 2027

COST

Model B costs 40–50% less onshore; Model C sits in between

Midpoints shown; ranges beside each bar. Model C, the proposal, keeps a 5-person desk and saves about 60–75% of what Model B saves. US figures are approximate Texas market rates for direct hires, plus 25% for benefits and payroll taxes, not quotes. No recruiting fees or infrastructure costs: hiring is in-house and all three models run on existing systems. Model B's only extra one-time item is a legal review of the Cockpit (quote needed).

$154–177K
saved a year with Model B
Model C: $94–114K

$278–333K
saved a year with Model B
Model C: $187–229K

$449–546K
saved a year with Model B
Model C: $328–400K

ROLLOUT

Earned in stages; January 1 never depends on new software

OCT–DEC 2026

Model A, with an exit option

7-person US desk hired in-house on 3–6 month contracts; legal and Gateway terms check; Cockpit build starts

Gate 0 · Nov 30: legal and terms both yes

JAN 1, 2027

Gateway goes US-only

Filed by Model A's desk

Hard regulatory deadline

FEB–MAR 2027

Cockpit pilot

20%, then 50% of volume, timed against manual entry

Gate 1 · Mar 15: ≤12 min, <0.5% errors, 98% first pass, no missed deadlines

MAR–APR 2027

Step down to 3

Hire the 3 permanent staff; let contracts end one at a time

Gate 2 · Apr 30: 4 weeks with backlog under 1 day

MAY 2027 ON

Scale the bold parts

AI determination reader live; the desk grows only on the backlog trigger

Kill switches: we return to Model A staffing if any of these happens

- The backlog stays above 1 business day for 5 days in a row
- The desk or a bundle causes a missed IDR deadline
- The error rate stays above 1% for 2 weeks
- The Gateway changes its terms or blocks the form filler

The way back is always ready: in-house recruiting keeps a bench of pre-screened candidates so 4 trained people can start within 2 weeks, and the manual ticket flow stays live.

RISKS

Model B swaps headcount risk for technology and concentration risk

RISK	LIKELIHOOD	IMPACT	RESPONSE
Gateway terms forbid the form filler	Medium	High	Gate 0 checks first; fall back to Model A staffing
One US absence cuts capacity by a third	High	High	2 trained on-call staff; leave rules; backlog kill switch
A Gateway screen change breaks the Cockpit's field mapping	Medium	Medium	Mapping fixed within 1 day; manual entry always available
AI drafts contain errors	Medium	High	Every draft approved by a specialist; weekly QA sample
A bundle defect spreads to many disputes	Low	High	100% bundle QA; fix the template, not just the case
US team burns out at 40 disputes a shift	Medium	Medium	Remote work, staggered shifts, pace review at Gate 2
